On November 4, 2025, the Company entered into an engagement agreement with Red Cloud Securities Inc. (“**Red Cloud**”) to act as sole agent and bookrunner in connection with a “best efforts” private placement (the “**Marketed Offering**”) for aggregate gross proceeds of up to C\$5,000,000 from the sale of any combination of the following:

Each Unit will consist of one common share of the Company (a “**Unit Share**”) and one common share purchase warrant (each, a “**Warrant**”). Each FT Unit and Charity FT Unit will consist of one common share of the Company to be issued as a “flow-through share” within the meaning of subsection 66(15) of the *Income Tax Act* (Canada) (each, a “**FT Share**”) and one Warrant. The Company has granted Red Cloud an option, exercisable in full or in part up to 48 hours prior to the closing of the Marketed Offering, to sell up to an additional C\$1,000,000 in any combination of Units, FT Units and Charity FT Units at their respective offering prices (the “**Agent’s Option**”).

The Marketed Offering and the securities issuable upon exercise of the Agent's Option shall be collectively referred to as the "**Offering**".

The Company intends to use the net proceeds from the Offering for the exploration and advancement of the Company's PL Gold Mine Project located in Manitoba as well as for working capital and general corporate purposes, as is more fully described in the Offering Document (as herein defined).

The gross proceeds from the sale of FT Shares will be used by the Company to incur eligible "Canadian exploration expenses" that qualify as "flow-through mining expenditures" as both terms are defined in the *Income Tax Act* (Canada) (the "**Qualifying Expenditures**") related to the Company's PL Gold Mine Project on or before December 31, 2026. All Qualifying Expenditures will be renounced in favour of the subscribers of the FT Units and Charity FT Units effective December 31, 2025.

The securities issuable from the sale of the LIFE Securities are expected to be immediately freely tradeable in accordance with applicable Canadian securities legislation for LIFE Securities sold to purchasers resident in Canada. The Units may also be sold in offshore jurisdictions and in the United States on a private placement basis pursuant to one or more exemptions from the registration requirements of the United States *Securities Act of 1933*, as amended (the "**U.S. Securities Act**").

The FT Units will be offered by way of the "accredited investor" and "minimum amount investment" exemptions under National Instrument 45-106 – Prospectus Exemptions in the Canadian Selling Jurisdictions. All securities not issued pursuant to the Listed Issuer Financing Exemption will be subject to a hold period in Canada ending on the date that is four months plus one day following the Closing Date as defined in Subsection 2.5(2) of Multilateral Instrument 45-102 – *Resale of Securities*.

The Offering is scheduled to close on December 3, 2025 or such other date as the Company and Red Cloud may agree (the "**Closing Date**"). Completion of the Offering is subject to certain conditions including, but not limited to, the receipt of all necessary regulatory approvals, including the approval of the TSX Venture Exchange (the "**TSXV**").

The securities to be offered pursuant to the Offering have not been, and will not be, registered under the U.S. Securities Act or any U.S. state securities laws, and may not be offered or sold in the United States or to, or for the account or benefit of, United States persons absent registration or any applicable exemption from the registration requirements of the U.S. Securities Act and applicable U.S. state securities laws. About Minnova Corp.

Minnova Corp. is focused on the restart of its PL Gold Mine, which included completion of a Positive Feasibility Study in 2018, based on a gold price of US\$1,250 per ounce. The study concluded the restart of the PL Mine, at an average annual production rate of 46,493 ounces over a minimum 5-year mine life, was economically robust. Importantly the global resource remains open to expansion, as does the reserve. The PL Gold Mine benefits from a short pre-production timeline forecast at 15 months a valid underground mining permit (Environment Act 1207E), and a 1,000 tpd processing plant. The project is fully road accessible and close to existing mining infrastructure in the prolific Flin Flon Greenstone Belt of Central Manitoba.
